Asaduzzaman Shuvro

Staff Software Engineer · Mobile & Backend

Dhaka, Bangladesh asaduzzaman.duet@gmail.com linkedin.com/in/asaduzzaman-shuvro
github.com/asaduzzaman-shuvro asaduzzaman.xyz

SUMMARY

Staff Software Engineer who spent a decade specializing in iOS before expanding into backend development, and now leads both. Proven record of shipping fast, reliable apps at scale — including a 252K-download news app at a 96% crash-free rate — and the Java services behind them. Strong in team leadership, architecture, code review and mentoring.

EXPERIENCE

Staff Software Engineer · Cefalo `2025 – now`

- Lead the iOS and backend teams (5 engineers) — project planning, stakeholder communication, on-time delivery.
- Set architecture and engineering standards across iOS (Swift, SwiftUI) and backend (Java, Spring, RabbitMQ).
- Built and run a Java connector between client services and Braze, handling 100K engagement events a day.
- Mentor engineers through code reviews and design discussions, with a focus on scalability, security and performance.

Apps: DN, TradeWinds

Senior Software Engineer · Cefalo `2021 – 2025`

- Led the iOS team that designed and shipped eight production apps.
- Spearheaded the DN news app — 252K downloads, 15.2K daily / 80K weekly active users, 96% crash-free.
- Introduced modularization and team-wide practices that cut build and release time by 60%.
- Mentored engineers into senior roles.

Apps: Europower, Upstream, Recharge

Software Engineer · Cefalo `2017 – 2021`

- Built SPENN, a cashless payments app launched in Rwanda and Tanzania.
- Hardened it for finance — encryption, SSL pinning, and data protection against attacks.
- Delivered business-critical features end to end within financial regulations.

Apps: SPENN

Software Engineer · GagaGugu (Bashundhara Group) `2016 – 2017`

- Built a social app with real-time audio/video calls (WebRTC), a timeline feed, and contact sync.
- Shipped a Share Extension for cross-app sharing, and led the sub-team behind the timeline.

Earlier · Advance Apps · Arena Phone BD · NestedApps `2014 – 2016`

- A fishing community and e-commerce app that grew to 50K+ active users, plus real-time shipment tracking.
- MyBL for one of Bangladesh's leading mobile carriers (150K downloads), with key architecture calls.
- A cartoon image maker (100K downloads) with a custom lazy-loading image grid.

Apps: MyBL, investFeed

SELECTED WORK

DN — Norway's business news, on iOS apps.apple.com/app/id1518764819

The iOS app for Dagens Næringsliv, Norway's leading business daily — a fast, hitch-free news feed for 15.2K daily and 80K weekly readers.

Braze engagement connector

A Java service that connects NHST's client systems to Braze for customer-engagement messaging — 100K events a day.

TripSplit github.com/asaduzzaman-shuvro/TripSplitter

A SwiftUI app for splitting group and trip expenses, with offline peer-to-peer sync and CloudKit backup.

S3 Storage Viewer github.com/asaduzzaman-shuvro/S3-Viewer

A Next.js web app for browsing and previewing a private S3 bucket behind a single shared password.

SKILLS

Mobile	Swift, SwiftUI, UIKit, Clean Architecture, Modularization, SSL pinning, Fastlane
Backend	Java, Spring Boot 3, RabbitMQ, Braze, REST APIs, TypeScript, Node.js
Leadership	Team leadership, Mentoring, Code review, Stakeholder communication, Agile delivery, OWASP Mobile Top 10

EDUCATION

B.Sc. Computer Science & Engineering · 2014
Dhaka University of Engineering & Technology (DUET)
